

Creating sustainable environments

THE OPERATION OF HEAVY MACHINERY IS THE NUMBER ONE CAUSE OF UNSUSTAINABLE ENVIRONMENTS

Vision: Creating sustainable environments

Mission: Unleash sustainability in off-road and commercial vehicles & infrastructure for extraction, processing, and transport of raw materials in challenging environments

Objectives: To develop intelligent, zero-emission off-road and commercial vehicles, and infrastructure and solutions for cut-to-length forestry industry and apply these technologies in parallel to other application areas such as construction, agriculture, logistics & mining

Autonomous solutions

Sustainable power

Data driven solutions

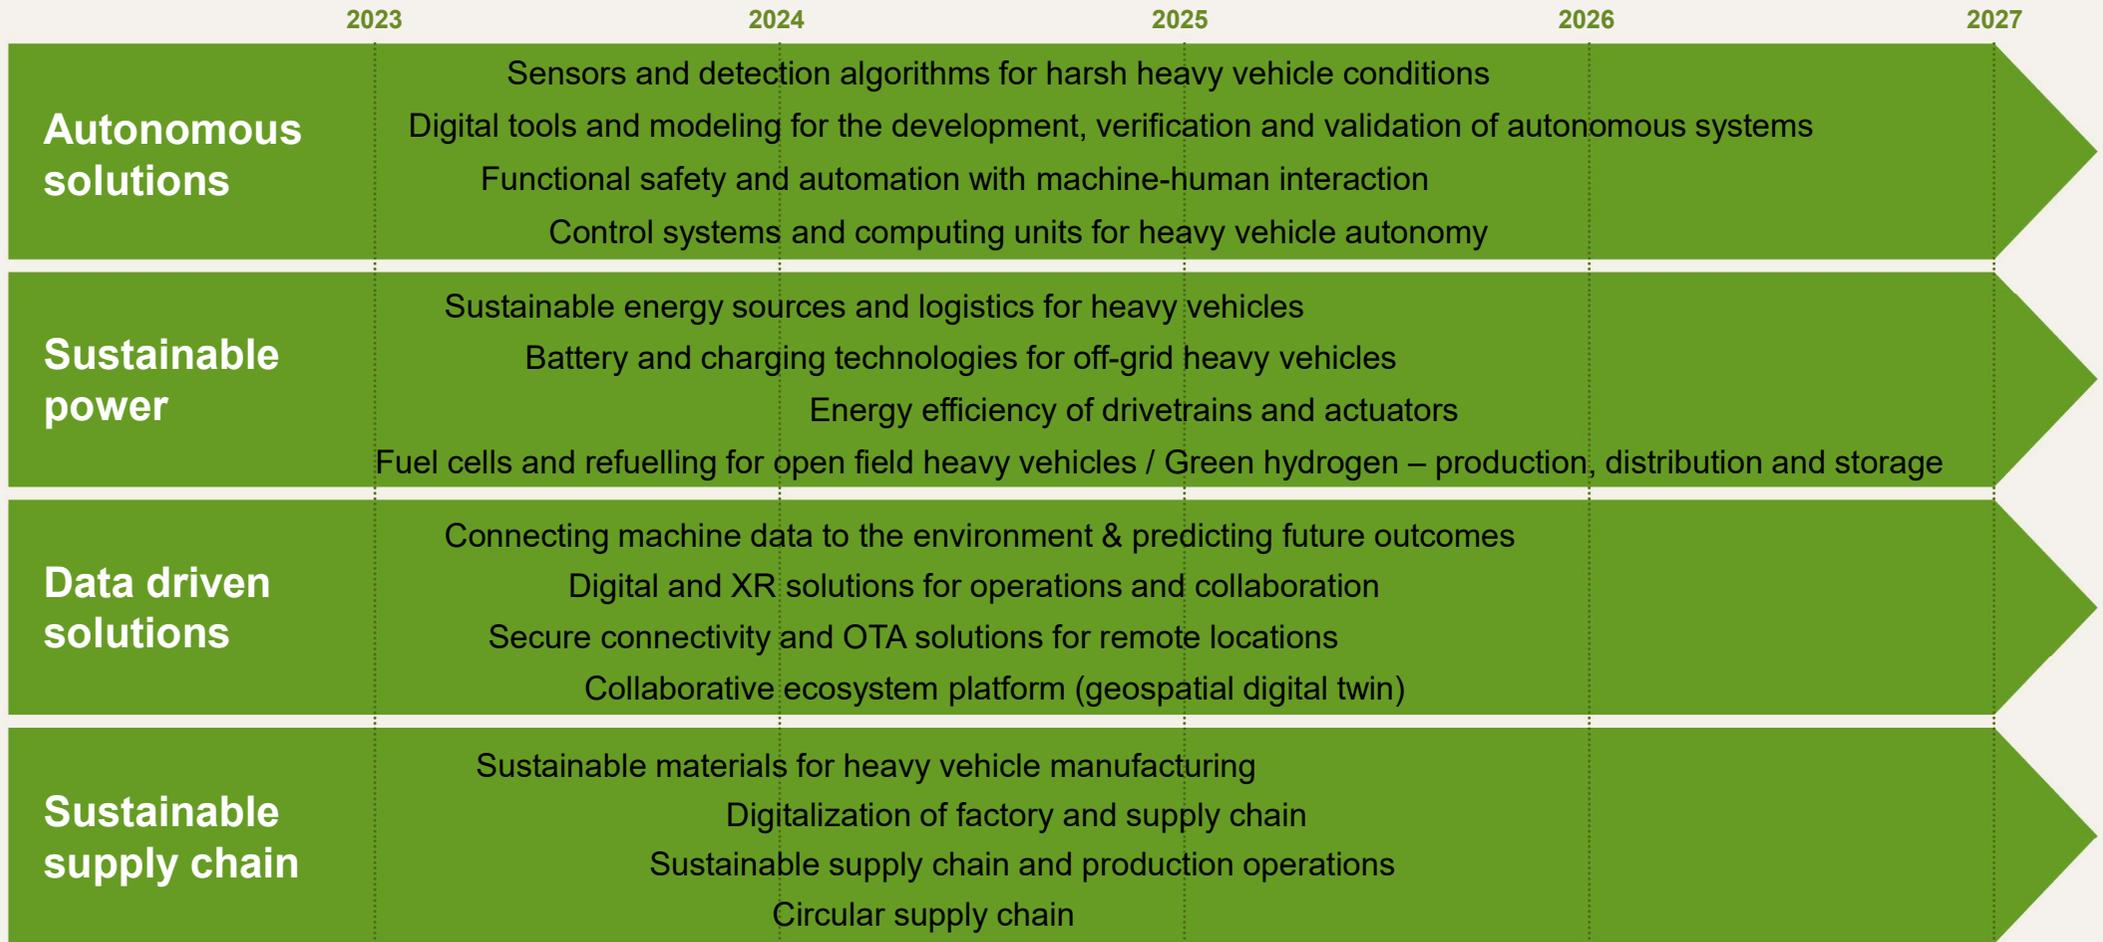

Sustainable supply chain

Creating sustainable environments & unleashing sustainability in off-road & Commercial vehicles

Unleashing the latent value in Sustainable power, high autonomy solutions and digital twin collaborative ecosystem platform will lead the way to more sustainable vehicles', infrastructure & ultimately to more sustainable environments

WE WILL SOLVE THE TECHNOLOGY & COMMERCIAL CHALLENGES

through collaboration in ecosystem projects to create solutions for off-road & commercial vehicles

CONTACT INFORMATION

We invite you to join us to create sustainable environments!
